RcodeZero DNS:

OUR FEATURES AT A GLANCE

Rcode 0 is Domain Name System shorthand for **error-free** – meaning that online services work perfectly. This is what our anycast service stands for.

www.rcodezero.at

ANYCAST FOR TLD REGISTRIES

Secure the permanent availability of your zones with the Anycast technology used by – and developed by – nic.at, the official .at domain registry. **Rcode**Zero **DNS** is specially designed for operators of TLDs: benefit from a reliable DNS infrastructure, high quality standards and a reliable partner.

No matter if you already have a secondary Anycast provider or not - the industry standard is at least one additional Anycast provider or more, to ensure stable DNS performance for your zone, your registrars and domain holders.
