

RcodeZero DNS
by nic.at

SIMPLE. FAST.
RESILIENT.

This is what RcodeZero DNS stands for.

www.rcodezero.at

TLD Registries

WE KNOW WHAT REGISTRIES NEED.

More resilience, better performance and lower latency for customers. That is what you can expect from **RcodeZero DNS** for TLDs. No matter if you already have another Anycast provider, the industry standard is at least one additional provider in order to deliver a fast and reliable DNS performance for your registrars and domain holders. Secure the permanent availability of

your zone with the technology developed and used by nic.at. As the Austrian domain registry and part of the worldwide TLD community, we designed **RcodeZero DNS** especially for operators of ccTLDs, new gTLDs and IDN TLDs. Because we understand the importance of reliable DNS infrastructure and registries' need for frequent zone updates and their high quality requirements.

THE MOST IMPORTANT ADVANTAGES OF **RcodeZero DNS**:

No set up fees	✓
Unlimited queries	included
DNSSEC included	free of charge
24/7 emergency hotline	✓
Clustered locations	✓
Zone transfer TSIG protected	✓
Zone transfer check ("golden records check")	✓
Full DNS traffic dumps in pcap-format	✓
DNS software from various vendors (BIND, NSD, Knot and Yadifa)	✓
Two independent DDoS mitigation services for the RcodeZero DNS network	✓

OUR ANYCAST NETWORK.

We are constantly expanding our global **RcodeZero DNS** server location network. Currently we have more than 20 nodes spread all over the world.

Klaus Darilion
Head of Operations

*“A central topic is the continuous expansion of our server locations to ensure stability, speed and reliability. We are proud that **RcodeZero DNS**, according to external name service monitoring, is always among the top providers worldwide.”*

From experts for experts

RcodeZero DNS has been developed by TLD experts – the Austrian registry nic.at.

5 GOOD REASONS FOR **RcodeZero DNS** AT A GLANCE

Transparent costs

We have no query limit which makes our price structure transparent and easy to calculate.

Global network

The global **RcodeZero DNS** network, with more than 20 global Anycast nodes across Europe, America and the Asia-Pacific region, is high performance and continuously expanding.

Personal support

We personally look after our customers – our support hotline is available Mo-Fri from 8 am to 6 pm (CET), our emergency hotline 24/7.

European partner

With **RcodeZero DNS** you have a European DNS partner that complies with European data protection standards.

*“We are proud that **RcodeZero DNS** comes from one of the fastest Anycast providers in Europe and among the top suppliers worldwide. Due to our knowledge and experience as the Austrian Registry, we have the relevant expertise and understand the requirements of our customers. It’s an honour that numerous global and European TLDs already use **RcodeZero DNS** and trust in our experience.”*

Richard Wein
CEO of ipcom & nic.at

CUSTOMERS WHO ALREADY RELY ON US.
