

RcodeZero DNS

by nic.at

RcodeZero DNS for Enterprises, ISPs and Resellers

RcodeZero DNS has been developed by TLD experts – the Austrian registry nic.at.

We have no query limit which makes our price structure transparent and easy to calculate.

We personally care for our customers – our support hotline is available Mo–Fri from 8 am to 6pm (CET), our emergency hotline 24/7.

The global RcodeZero DNS network is highly performant and continuously expanding - the actual number of nodes is shown on our website www.rcodezero.at.

With RcodeZero DNS you have a European DNS partner which underlies European Data Protection Standards.

All prices excl. VAT

WHO IS ipcom?

ipcom is a subsidiary of **nic.at**, the Austrian domain registry. **nic.at** has managed the **.at**-zone since 1998 on a highly professional and reliable level. The **RcodeZero DNS** network was developed by **nic.at**'s R&D department and has been successfully in use for zones like **.at**, **.versicherung**, **.berlin**, **.hamburg** and several more. External name service monitoring by RIPE NCC proves that **.at** is one of the most reliable top level domains.

Rely on our experience for your DNS diversity and resilience.
